56 class		1PC.	
71 class		1PC.	
140 class		1PC.	
		M5×30	

Required Tools

Screw driver +

Operating procedures

1. Remove the air discharge flange from indoor unit.
2. Attach the air discharge adapter to the indoor unit.
 - ① Tighten two screws to the indoor unit.
(Leave about 20mm of the thread exposed)
 - ② Hang the air discharge adapter on the screws and then tighten all screws definitively.

Cautions for the installation

Fasten the screws tightly so as no gap between the indoor unit and the air discharge adapter is made.
